ABOUT

A 20-year-old Full-Stack Developer, graduated in Digital Development with a Full-Stack option at ISTA Agadir, currently pursuing a Bachelor's in Computer Science at the Private University of Marrakech. Passionate about creating intuitive and high-performance web solutions, I am accustomed to designing complete applications, from front-end to back-end. My goal is to deliver scalable products focused on user experience.

PROFESSIONAL EXPERIENCE

- Taghazout Discovery - Web Developer (Oct. - Dec. 2023)**
Creation of a WordPress showcase website: custom theme, plugins, SEO, client training.
- Agadir Discovery - WordPress Developer (Jan. - Feb. 2024)**
Complete WordPress website: bookings, Stripe payments, SEO, responsive design, team training.
- Agadir Journey - Full-Stack Intern (Apr. 2024)**
Full development of a tourism website with Laravel and MySQL, participation in all project stages (analysis, UML design, development, deployment). Use of Agile/Scrum methodologies, shared hosting, and performance optimization post-launch.
- Paddle Out Morocco - Développeur WordPress & Rédacteur SEO (Juin - Août 2024)**
WordPress site creation, SEO-optimized article writing, keyword analysis, content improvement for better Google ranking, responsive design.
- Ikotech - Full-Stack Developer (Sept. - Oct. 2024)**
Management application (React + Firebase): inventory, sales, dashboards, authentication.
- Global Explore Tours - WordPress Developer (Dec. 2024 - Feb. 2025)**
Online booking website: Stripe payments, SEO, responsive design, CRM integration.
- Mega Group TV - WordPress/Node.js Developer (Feb. 2025)**
Development of a WordPress plugin connected to a Node.js API: customer management, automated emails, data synchronization, cron jobs.

PERSONAL PROJECTS

- Chat Application with React, Supabase, Firebase, and Redux**
Real-time chat application with Google authentication and message synchronization using Firebase and Supabase.
- Social Media Application with the MERN Stack**
Interactive platform with real-time chat, dynamic posts, comments, likes, and friend request system, developed with the MERN stack.
- Telecom Management Program with Python**
Telecom management system developed in Python with a PyQt5 interface and SQLite database.
- E-commerce Store with PHP, MySQL, and AJAX**
E-commerce site with advanced features: detailed product pages, real-time interaction, powerful admin panel, and optimized user experience.
